

SEO AUDIT REPORT

ahrefs.com

Prepared by: Farhan Siddique	Date: May 2026	Type: Full-Site SEO Analysis	Confidential
------------------------------	----------------	------------------------------	--------------

81/100 Overall Score	88/100 On-Page SEO	79/100 Technical SEO	85/100 Content Quality	74/100 Backlink Profile
-------------------------	-----------------------	-------------------------	---------------------------	----------------------------

01 EXECUTIVE SUMMARY

Ahrefs.com is the industry-standard SEO tool platform, widely regarded as the world leader in backlink analysis and keyword research. The site benefits from exceptional domain authority, a vast and high-quality backlink profile, and a content strategy that perfectly aligns with product positioning. This audit identifies Ahrefs.com as the strongest performer across all five dimensions evaluated, with primary opportunities concentrated in mobile speed optimisation, schema markup expansion, and content freshness maintenance.

CATEGORY	STATUS	PRIORITY	IMPACT
On-Page SEO	EXCELLENT	LOW	Best-in-class execution throughout
Technical SEO	GOOD	LOW	Minor mobile LCP improvement needed
Content Strategy	EXCELLENT	LOW	Gold standard content quality
Backlink Profile	STRONG	LOW	Elite domain authority maintained
User Experience	GOOD	LOW	Strong desktop, minor mobile gaps
Mobile Optimisation	GOOD	MEDIUM	LCP just above threshold

02 ON-PAGE SEO ANALYSIS

2.1 Title Tags & Meta Descriptions

Ahrefs.com demonstrates best-in-class on-page SEO execution. Title tags are precisely crafted with primary keywords front-loaded, meta descriptions are unique across 95%+ of pages, and header hierarchies are consistently maintained throughout. Internal linking is data-driven and strategic - authority flows effectively from supporting content to high-value tool and landing pages.

ELEMENT	STATUS	NOTES
Title Tags	EXCELLENT	Keyword-first, precise length control throughout
Meta Descriptions	OPTIMIZED	Unique and compelling across 95%+ of all pages
Header Tags (H1-H3)	EXCELLENT	Clean, consistent hierarchy - zero exceptions found
Keyword Targeting	EXCELLENT	Precise intent matching, zero stuffing detected
Image Alt Text	GOOD	~8% of images missing alt attributes - minor gap
Internal Linking	EXCELLENT	Strategic authority flow to product and tool pages
URL Structure	OPTIMIZED	Short, clean, keyword-rich slugs throughout
Canonical Tags	PRESENT	Correctly implemented - no duplication issues found

2.2 Content Quality Assessment

Ahrefs' blog content sets the industry benchmark for SEO education. Posts are deeply researched, data-driven, and regularly updated - a clear content refresh process is in place and visibly executed. The content team consistently produces comprehensive guides backed by original data, case studies, and actionable frameworks. Content freshness is actively maintained, though a small number of cornerstone posts are approaching the 12-month update threshold.

2.3 Keyword Strategy

Ahrefs ranks for an exceptionally wide range of high-intent SEO and digital marketing keywords. The content strategy perfectly aligns with product positioning - tutorials, guides, and tool landing pages work in synergy to capture users at every funnel stage. Primary opportunity: expanding FAQ-style content structures for featured snippet and AI Overview capture, where question-heavy educational content is ideally positioned to dominate.

03 TECHNICAL SEO ANALYSIS

3.1 Site Speed & Core Web Vitals

Ahrefs.com demonstrates the strongest Core Web Vitals performance of the three sites audited. Desktop metrics are excellent across all dimensions. Mobile LCP at 2.9s slightly exceeds Google's 2.5s recommended threshold - the only meaningful technical gap identified. CLS and FID scores are well within acceptable ranges on both desktop and mobile.

METRIC	DESKTOP	MOBILE	TARGET	STATUS
LCP (Largest Contentful Paint)	1.6s	2.9s	< 2.5s	WARN
FID (First Input Delay)	8ms	22ms	< 100ms	PASS
CLS (Cumulative Layout Shift)	0.02	0.07	< 0.10	PASS
TTFB (Time to First Byte)	0.3s	0.5s	< 0.6s	PASS
Speed Index	1.8s	3.2s	< 3.4s	PASS

3.2 Crawlability & Indexation

Ahrefs.com demonstrates excellent technical SEO fundamentals. The XML sitemap is properly configured and submitted. HTTPS is fully implemented with an A+ SSL rating. Crawl depth is outstanding - virtually all important pages are reachable within 2 clicks from the homepage. No 302 redirect issues were detected. One minor concern: a small number of paginated blog archive pages lack proper canonical handling, which may dilute crawl equity.

3.3 Structured Data & Schema

Ahrefs implements Article and SoftwareApplication schema effectively. However, FAQ schema is absent from blog posts - a significant missed opportunity given the question-heavy educational content format. Video schema is also absent from pages embedding tutorial videos, despite this content being highly relevant for rich results. Implementing FAQ schema on the top 30 posts and Video schema on tutorial pages could meaningfully increase SERP CTR.

04 BACKLINK PROFILE ANALYSIS

Ahrefs.com possesses one of the most enviable backlink profiles in the digital marketing industry - approximately 85,000 referring domains with a toxic link ratio under 1%. The site earns high-authority editorial links from major tech publications, universities, and industry leaders. Link velocity remains consistently positive with no signs of decay.

Metric	Value	Benchmark	Assessment
Domain Authority (est.)	89/100	Elite - top 0.5% of all sites	EXCELLENT
Total Referring Domains	~85,000	Industry leader	STRONG
New Links (Last 90 days)	Positive	Consistent growth trend	GOOD
Toxic / Spammy Links	< 1%	Industry best - exceptional	EXCELLENT
Anchor Text Diversity	Strong	Natural, well-distributed	GOOD
Dofollow / Nofollow	79%/21%	60-80% dofollow target	GOOD
Editorial Link Ratio	Moderate	Room to grow editorial share	FAIR

05 PRIORITY ISSUES & RECOMMENDATIONS

Pri.	Area	Finding	Recommendation
HIGH	Mobile LCP	Mobile LCP 2.9s slightly above Google's 2.5s threshold	Optimize key page delivery, implement WebP/AVIF, preload critical LCP resources
MEDIUM	FAQ Schema	No FAQ schema despite heavily question-based content	Implement FAQ schema on top 30 blog posts to capture rich results
MEDIUM	Video Schema	Tutorial and demo videos embedded without VideoObject schema	Apply VideoObject schema to all pages containing instructional videos
MEDIUM	Blog Pagination	Paginated archive pages lack canonical or rel=next/prev tags	Implement canonical tags pointing to page 1 across all paginated archives
MEDIUM	Alt Text	~8% of images missing alt attributes - primarily in blog body content	Logically log post images; add descriptive keyword-relevant alt text
MEDIUM	Editorial Links	High proportion of links are tool-driven rather than editorial	Invest in original research studies and data reports to earn editorial citations

05 PRIORITY ISSUES (CONTINUED)

PRI.	AREA	FINDING	RECOMMENDATION
LOW	Content Freshness	Several cornerstone posts approaching 12-month update window	Review top 20 evergreen posts quarterly; update stats, examples, screenshots
LOW	Anchor Diversity	Slight over-concentration of branded anchor text on 50+ pages	Diversify anchor text in outreach - target partial-match and natural anchor text
LOW	Archive Pages	Low-value tag/category pages provide minimal unique content	Consolidate/rewrite archives or add meaningful introductory content to key categories
LOW	Hreflang	Hreflang implementation for international pages could be improved	Add all hreflang tags; fix missing or incorrect annotations for localised pages

06 90-DAY ACTION PLAN

PHASE 1 - DAYS 1-30 | Quick Wins

- Add alt text to all blog post images identified as missing attributes
- Fix paginated archive pages - implement canonical tags correctly
- Implement FAQ schema on top 10 highest-traffic blog posts immediately
- Add VideoObject schema to top 5 pages with embedded tutorial videos
- Audit and correct hreflang tag inconsistencies in localised pages

PHASE 2 - DAYS 31-60 | Technical Fixes

- Optimise mobile LCP - preload hero images, convert to WebP/AVIF formats
- Expand FAQ schema rollout to top 30 blog posts
- Add VideoObject schema to all remaining tutorial and demo pages
- Consolidate or enrich thin tag and category archive pages
- Conduct anchor text audit; adjust outreach templates for better diversity

PHASE 3 - DAYS 61-90 | Growth & Authority

- Commission a major annual SEO industry data study for editorial link acquisition
- Develop 2-3 new free tools to generate natural inbound links and brand mentions
- Establish a quarterly content review cycle for all top 20 evergreen posts
- Expand international SEO with comprehensive hreflang coverage
- Launch thought leadership content targeting editorial citations from academic sources

TOOLS & METHODOLOGY

TOOL	PURPOSE
Google Analytics / Search Console	Traffic data, keyword rankings, indexation status
Screaming Frog SEO Spider	Technical crawl — redirects, alt text, broken links, meta tags
PageSpeed Insights	Core Web Vitals — LCP, CLS, FID, TTFB measurements
Semrush / Ahrefs (Reference Data)	Backlink profile, domain authority, referring domains
Schema.org Validator	Structured data verification and rich result eligibility
Manual Content Review	Content quality, keyword strategy, UX and readability
